Week 1 Jan 12—Jan 18

CLASS IS HERE

JAN 12

End-to-end AI Engineering bootcamp Prep

MON 1/12 6:00 PM—7:00 PM (GMT+2)

Join

Sprint 0 – Problem Framing, Infrastructure Setup & RAG Foundations

0%

- Lesson 1: Understanding the AI product lifecycle
- Lesson 2: Tooling overview (LangGraph, vector DBs, LLM APIs, etc.)
- Lesson 3: What is RAG?
- Lesson 4: Embedding models & vector DB integration
- Lesson 5: Implementing basic observability foundations
- Lesson 6: Evaluating basic end-to-end retrieval and generation

Understanding the AI product lifecycle

Tooling overview (LangGraph, vector DBs, LLM APIs, etc.)

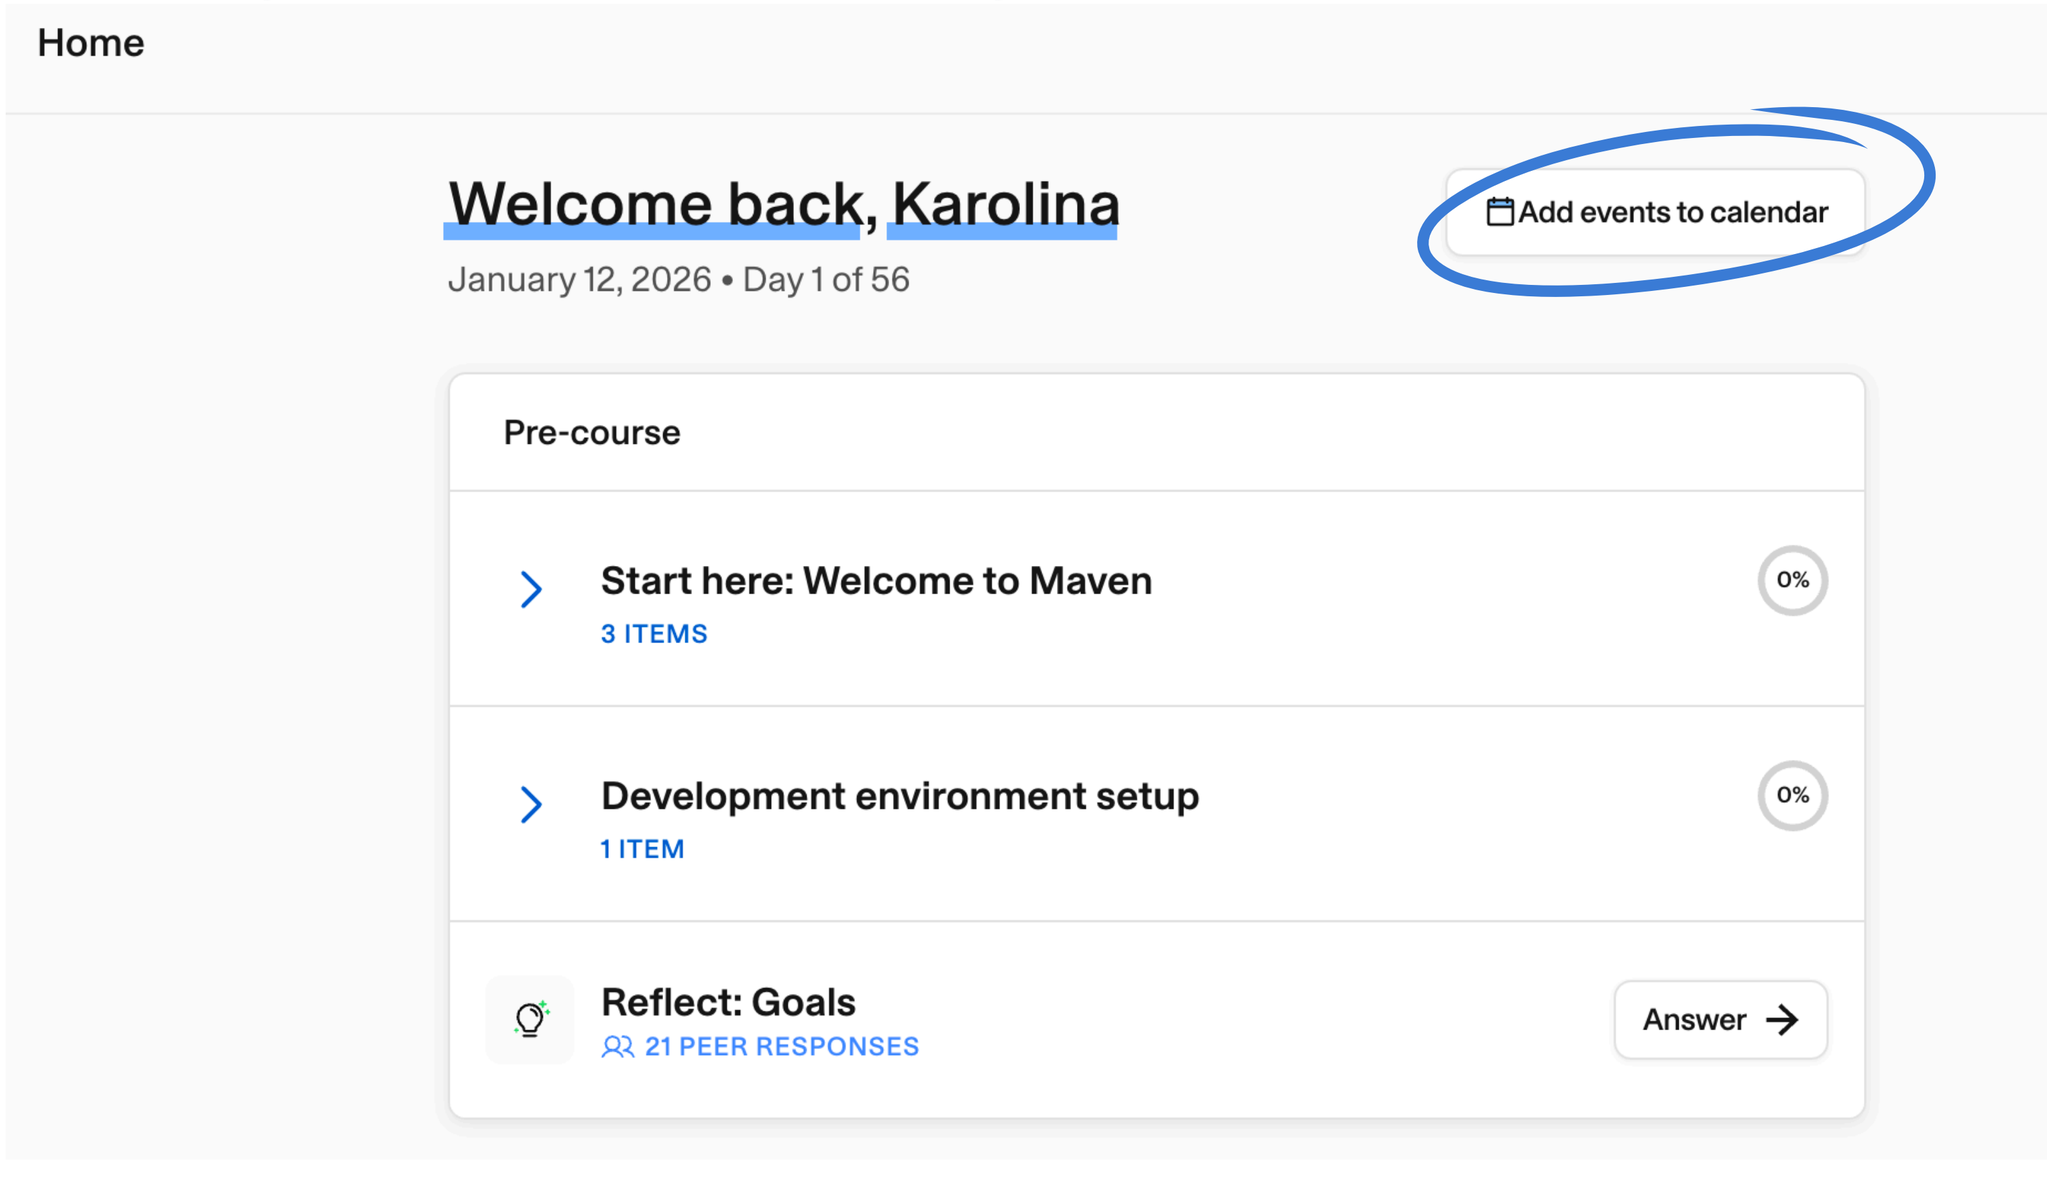
What is RAG?

Embedding models & vector DB integration

Implementing basic observability foundations

SWIRL AI

Navigating Maven



SWIRL AI

Communication Guidelines

- Primary communication channel - **Discord**
- Communication best practices:
  - *Use clear, concise, and professional language.*
  - *Clearly specify issues/questions (include context, code snippets, errors).*
  - *Leverage peer collaboration.*
- Response timeline: 24 hours during workdays.

SWIRL AI

Points of Contact & Support Resources

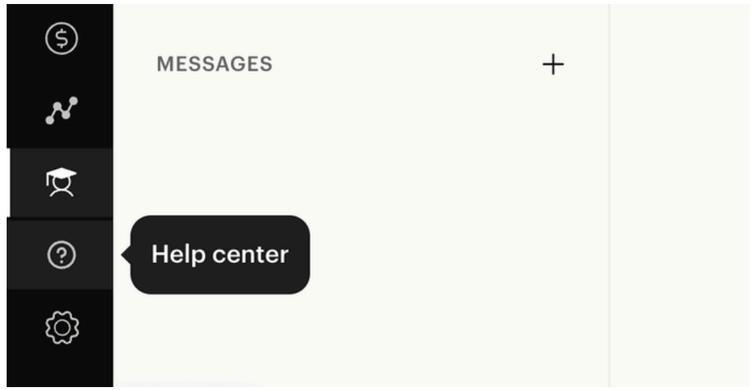
1.

Aurimas

2.

Peer support

3.



Maven’s Help center

SWIRL AI

Expectations & Learner Commitment

- Commitment to consistently dedicate sufficient time weekly to engage fully with all bootcamp components (lectures, capstone project, self-study).
- Proactive communication regarding challenges and seeking assistance when needed.
- Responsibility for meeting deadlines and milestones with clear, structured submissions.
- Active involvement in peer reviews, discussions, and collaborative exercises to enrich the learning experience for all participants.
- Professional and respectful interaction within the bootcamp community.

SWIRL AI

Learnings from the previous Cohort

- On average students are spending 16 or more hours per week.
- The material should be referred to for many months after the cohort is finished.
- Unexpected interruptions can happen resulting in schedule changes.
- Some topics can be rearranged throughout the bootcamp for more effective flow.
